

MT4 Installation Instructions

1. If an installer window appears asking if you should run this program, please click “Yes” to proceed.
2. A window will appear asking you to select your desired language. Click “Next” once you’ve made your choice.
3. Follow the instructions in the next window that appears and click “Next” when finished.
4. You must accept the End User Agreement to proceed with the installation. You can do this by checking off the small box at the bottom of the window. Click “Next” when you’ve finished.
5. Select your desired installation folder and click “Next.”
6. Finally, click “Next” one more time to allow the software to install. When this is complete, click on the “Finish” button and make sure to check off the little box on the screen to launch the program at the same time.
7. Once the software opens you must create a demo in order to test it out. To do this go to the top of the screen, select “File” and then go to “Open An Account.” Please fill out the information in the required fields, click “Next” and then click “Next” once again. Finally, click on “Finish” to log into your demo. The first time you see the demo, you’ll notice the chart windows will display “Waiting for Update.” Simply drag a currency pair from the Market Watch window on to the chart to perform your analysis and begin trading.
